

# 120+ Municipal Resolutions adopted in 19 counties

County Adoptions

More than 110 of the Resolutions are *Information Request* type asking applicants and the PSC to conduct cost-benefit analysis of *Non-Transmission Alternatives* including energy efficiency, load management and local renewable power. Applicants are asked to conduct the analysis *during the public information stage* for inclusion in their application and sharing with local governments for statutory energy planning consideration and making informed feedback. The PSC is requested to independently conduct the analysis and include its study in the EIS of current and future 345 kV transmission proposals. see EIS Table G1-1, PSC REF#:223845
